

Add Lighting to Brighten the Kitchen

Highlight the beauty of your cabinet design with LED lighting from Task Lighting & Power®. Select from a variety of assembled linear fixtures, tape lighting, puck lights, and specialty lighting—allowing your clients to set the mood in any room.

Catalina Polar White & Slate Cabinets

1 ILLUMINATE COUNTERTOPS WITH UNDER CABINET LIGHTING

Illuminate countertops with under cabinet lighting to enhance functional spaces, highlight beautiful backsplashes, or eliminate shadows created from cabinets. Under cabinet lighting creates ample illumination for meal prep and reading recipes.

2 ACCENTUATE DECORATIVE ITEMS ON DISPLAY WITH IN CABINET LIGHTING

Use lighting in glass-faced cabinets to accentuate decorative items on display or highlight beautiful crystal and china. Adding lighting inside a glass door cabinet gives a nice wash of light throughout the cabinet.

3 HIGHLIGHT BEAUTIFUL FLOORING WITH TOE KICK LIGHTING

Add lighting under the toe kick to highlight beautiful flooring during the daytime. At night, keep floors safely illuminated with a gentle glow for midnight snacking.

4 ADD AMBIANCE AND MAKE THE SPACE FEEL LARGER WITH ABOVE CABINET LIGHTING

Add depth and ambiance to your kitchen by highlighting the open space above cabinets to increase the aesthetic appeal and make the space feel larger.

Select the Perfect White Color Temperature for Lighting Any Space

When installing lighting, it's important to select an optimal white color (Kelvin) temperature that accentuates the beauty of the space. Pro tip: Using the same color temperature lighting throughout a room gives it a clean, even feel.

Or...Use Tunable White Lighting to Easily Change the White Color Temp Any Time!

Install tunable white lighting with patented TandemLED® technology to experience full tuning control of the white color temperature, from Warm White to Daylight White and all shades of white in between.

Using the wireless controller, adjust the white color temperature of tunable white lighting at any point throughout the day to match the natural lighting outside. A routine can also be set up in a Smart Home system's app to mimic the natural outdoor lighting throughout the day automatically.
